

Electro Harmonix Tri Parallel Mixer Effects Loop Mixer / Switcher

Šifra: 18059
Kategorija proizvoda: Pedale
Proizvođač: Electro Harmonix

Cena: 19.080,00 rsd

Electro Harmonix Tri Parallel Mixer Effects Loop Mixer

Circuit: AnalogAnalog w/ Digital Control
Bypass: Buffered Bypass
Audio: Mono
Effects Loop: Yes
Power Supply: 9.6VDC-200mA power adapter included
Dimensions (in): 5.75 x 4.75 x 2.5
Current Draw: 45mA
Year Released: 2019

The EHX TriParallel Mixer is a powerful effects creation and mixing hub with three separate FX loops and flexible controls allow for multiple configurations.

The Tri Parallel Mixer is surprisingly compact considering the level of functionality it provides, while its intuitive controls and I/O make it easy to operate.

Use it to switch between or mix up to three separate effects loops. Send a guitar or other instrument out to three separate amplifiers, or input three separate instruments to switch between or mix to a single output. Mix effects in parallel to create sounds and allow for options not possible when using effects in series (one after another).

Run up to three FX Loops in parallel and create sounds that are not possible by connecting effects in series

- Switch seamlessly between FX Loops in XOR mode
- Send one instrument out to three separate amplifiers
- Mix three instruments into a single output
- Power supply included
