If you've ever wanted your controller keyboard to be as cool as you, look no further. Need a pint-size studio solution with a look that matches your music's attitude? You've just found it. Need a trusty bandmate with a soul as dark as yours? Here it is.

MiniLab MkII Deep Black is here to tempt you. Give in.

Want to learn more about the features and functions of MiniLab MkII Deep Black? It works in exactly the same way, and includes the same software as the regular MiniLab MkII. Here's a quick rundown:
Be creative anywhere

MiniLab MkII Deep Black is tiny. It fits perfectly in your lap, in small spaces in your home studio, balanced on top of other gear, and even on an airline tray-table. Don't let a lack of space get in your way. Whenever you get the chance to live out your creativity, this little controller will be ready.

Pint-sized control freak

Small but mighty, MiniLab MkII Deep Black has an expressive, velocity sensitive keyboard, 8 RGB backlit pads, and 16 rotary encoders to put you in total control of your virtual instruments, DAW, and effects. 2 knobs are even clickable, letting you navigate menus and select presets right on your controller!
