Playdifferently is known for making creative instrumental tools for performing and mixing music.

In 2017, they came through with the MODEL 1, which was engineered by Andy Rigby-Jones and co-designed by Richie Hawtin. The MODEL 1 is a purely analogue mixer featuring technology normally found in the finest studio consoles.

It is commonly used as live DJ mixing equipment with its mixer capabilities. Full of knobs and faders for EQ, filters, levels and syncopation it is crucial you protect them from any unwanted dust, debris, spills or accidental impacts.

For that problem, we have researched, designed and engineered a super-tough but lightweight polycarbonate lid that helps keep the MODEL 1 safe from harm. It shields delicate sliders, knobs and internal components from damage at home, on the road and on stage.

Each design is rigorously tested before it carries our name so you can rest assured that your MODEL 1 will always be safe with a Decksaver cover.
