Audeze LCD-X Alu Rings Leather

Taking the Room out of the Equation

The class-leading resolution and impressively low distortion makes the LCD-X comparable to high end speaker systems, without requiring large, expensive acoustic room treatments. When used with Audeze Reveal+ to create an AI-generated map of your own hearing, the LCD-X puts you inside renowned studios, letting you mix consistently and efficiently

Accuracy, Transparency, and Efficiency

LCD-X leverages patented Audeze technologies, including Ultra-Thin Uniforce™ diaphragms, Fazor waveguides, and powerful neodymium magnets to deliver extremely accurate and detailed sound. The sophisticated planar magnetic drivers achieve a high efficiency with low impedance, such that LCD-X can deliver great sound from nearly any device with a headphone output. Together, these innovations enable audio professionals to efficiently get their mix done right in a variety of settings.

Designed for Comfort

Audeze has improved the LCD-X over the years, lowering the weight and increasing comfort. It features a suspension headband for even weight distribution, and highly-cushioned premium earpads for support. The neutral tuning and low distortion prevent listening fatigue, so those late-night sessions never have to end.

Style	Over-ear, open-back
Transducer type	Planar Magnetic

Magnetic structure	Proprietary magnet array
Phase management	Fazor™
Magnet type	Neodymium N50
Diaphragm type	Ultra-Thin Uniforce™
Transducer size	106 mm
Maximum SPL	>130dB
Frequency response	10Hz - 50kHz

THD	<0.1% @ 100 dB SPL
Sensitivity	103 dB/1mW (at Drum Reference Point)
Impedance	20 ohms
Max power handling	5W RMS
Min recommended power	> 100mW
Recommended power level	>250mW
Cable	1.9m (6.2ft) length 4-pin XLR with Single ended 1/4" (6.3mm) adapter

Wire material	20 AWG high-purity OCC audio-grade copper
Weight	612g
