Eversolo DMP-A8 Streamer Mrežni plejer

Šifra: 18480
Kategorija prozivoda: Network Plejeri
Proizvođač: Eversolo

Cena: 237.600,00 rsd

Key Features

Eversolo's most powerful Network Streamer
Upgraded Dual DAC Solution with AK4499EX & AK4191EQ improves processing over DMP-A6
New Dual Hybrid Power Supply with additional Linear PS optimises analogue & digital workload
Support for ultra-high sampling formats, including DSD512 and PCM768Khz/32bit
Incorporates network services including DNLA, Tidal, Qobuz and numerous third-party apps

Connect the way you like

First and foremost, the DMP-A8 is a centre point of high-resolution digital audio connectivity. However you want to connect, this streamer will comfortably accommodate your equipment. It supports multiple digital inputs, including a HDMI-IIS port, as well as two coaxial, two optical, and USB B for connection to PC and mobile. The high-performance, fully-balanced preamplifier circuit also supports XLR and RCA analogue equipment, both input and output. Additionally, the DMP-A8 features a range of convenience capabilities, such as HDMI ARC for enhanced TV audio and a Qualcomm QCC5125 Bluetooth receiver, supporting version 5.0 and LDAC, SBC, AAC, and aptX, aptX LL and HD. This poses a significant and instant upgrade to your amplifier and lets you indulge in a world of high-quality audio content. It even has a trigger port for integration with the rest of your hi-fi system.

EOS Audio Engine

The DMP-A8 is compatible with most ultra-high sampling master recording formats, including FLAC, WAV, APE, and DSD512 stereo formats. It is powered by the proprietary EOS (Eversolo Original Sampling-rate) Audio Engine, an innovative technology unique to Eversolo that enables output at original audio sampling rates. With this, you can bypass Android SRC limitations and enjoy direct audio passthrough from third-party apps like Apple Music.

High-speed digital processing

Using third-generation XMOS 316 audio processing, the DMP-A8 is capable of higher USB processing, supporting DSD512 Native and PCM768/32bit, while optical and coaxial ports support DSD64(DOP) and PCM192/24bit. With this advanced audio interface, you can enjoy your music with pristine clarity and uncompromising quality. This streaming uses a dual AK4191EQ / AK4499EX DAC solution to provide continuously authentic sound.

Access a world of streaming

The Eversolo DMP-A8 Streamer is your gateway to online music. Access the most popular platforms like TIDAL, Qobuz, HIRESAUDIO, and Deezer. With Tidal Connect and DLNA support, you can seamlessly integrate the DMP-A8 into your home music network and explore an extensive library of music; Your tracks through your favourite apps. You can even play content from your NAS or network drives too, including UPnP amongst others. Experience uninterrupted playback, no matter how you're listening.

High-quality components

The DMP-A8 utilises two ultra-low phase noise femtosecond clocks, ensuring high-precision decoding for digital-to-analogue conversion. These clocks correspond to different sampling rates, effectively reducing jitter and improving dynamic range. This rests on a foundation of professionally tuned components, contributing to low distortion and noise. To minimise interference, the system also employs dual power

supplies with a toroidal transformer optimised for analogue audio circuits. The system circuit incorporates a switching power supply that reduces ripple and magnetic leakage for improved audio processing.

Large HD LCD user interface

There's no need for eye strain with the Eversolo. This network streamer boasts a large, six-inch HD LCD touchscreen with a stylish, yet simple user interface to make menu navigation easy. As well as onboard control, you can also use the Eversolo controller app (available for iOS and Android) or the included Bluetooth controller for system navigation and playback from a distance. Experience a personalised and interactive audio journey with our dynamic VU meters and spectrums. Enjoy real-time full-format music display, including DSD, for an incredibly immersive experience.

Modern looks for the digital age

Engineered from aviation-quality aluminium, the DMP-A8 features a CNC machined body that exudes the signature Eversolo style, with a brushed panel and frosted anodised body. The designers have once again combined classic and modern elements, making it a stylish addition to any audio setup and an exclusive connection to the digital world. The DMP-A8 comes with an M.2 NVMe SSD slot at the bottom, providing a convenient way to increase storage without the need for post-purchase disassembly. The DMP-A8 supports up to 4TB storage, which offers faster speed and less noise than traditional storage options.

Key Features

Support for a range of incredible music streaming services, including hi-res platforms like Tidal, Qobuz HIRESAUDIO and more
Also accommodates Tidal Connect and DLNA, letting you stream music between devices and fully integrate the A8 into your audio system
Eversolo Original Sampling-rate Audio Engine supports output at the original sampling rate
AK4499EX and AK4191EQ dual DAC solution ensures consistent digital audio processing
DAC settings let you switch between six digital filters for different sound characteristics and genres
HDMI-IIS Output for integration with external DACs featuring an IIS input
Features an HDMI ARC input, providing your TV audio with a connection to your hi-fi system and an upgrade in sound quality
Qualcomm QCC5125 Bluetooth 5.0 Module supports SBC, AAC, aptX, aptX LL, aptX HD, and LDAC
Quick installation of up to 4TB of storage space with the built-in M.2 NVMe SSD slot on the bottom of the DMP-A8
Features a DSP processor a support for DSP volume control, PEQ, FIR Filter, HPF/LPF, Compressor, Delay and Loudness enhancement
Enjoy a low-noise, high-fidelity sound experience with the R2R analogue volume control network, featuring a +10dB analogue gain
Professionally tuned for clarity, with extremely low distortion and operational noise (rated SNR of 128dB)
Highly accurate digital-to-analogue conversion and decoding with two ultra-low noise femtosecond clocks, with multiplied sampling rates of 44.1kHz and 48kHz respectively
Integrated with media management functionality, as well as a for USB OTG configurable USB Type-C port for PC connection
CD Rip app supports lossless CD playback and ripping via USB optical disc
Hi-res Audio certified by JAS

What's in the Box?

The Eversolo DMP-A8 Network Audio Streamer
1 x Power cable
1 x Remote control
1 x Screwdriver
