Kategorija proizvoda: Dodatna oprema i održavanje

Proizvođač: Pro-Ject

Cena: 11.880,00 rsd

Cleaning a record collection can be tiresome. There are many ways to de-dust your precious collection. All of them have one thing in common, you have to clean the records while they are put at rest. Sweep it E goes the other way. You can enjoy listening to your records while they are being cleaned. Simply place Sweep it E on your turntable and make sure that the brush is placed before the needle. This way the grooves will get clean right before the cartridge can pick up sound from it.

Sweep it E is made out of durable and resistant aluminium to make sure it lasts a long cleaning-life. With the heavy weight base it stands firmly on your turntable. The uni-pivot arm follows the grooves of your record and cleans them effectively. When you don't need Sweep it E you can simply put the arm on its dedicated arm-rest for a comfortable placement. The soft hair-brush guarantees that the records won't be harmed during the cleaning process.
