76

keys

that cover a wide variety of songs and the range of many instruments.

Dynamic performance across a full range of low to high notes of 76 keys.

AiX Sound Source uses careful analysis to capture the musical characteristics of many instrument sounds.

Diverse sound palette of 61 carefully selected tones, such as acoustic pianos, electric pianos,

organs, and synthesizers, which also includes a number of vintage instruments.

Horizontal Bass-Reflex System produces powerful sounds even within a compact body.

Lightweight and portable design that makes it easy to position and play anywhere.

User-friendly design with easy-to-use, intuitive controls that create a comfortable playing experience.

Stylish design that seamlessly blends into any living space.

Wireless connectivity via the optional Wireless MIDI & Audio Adapter (WU-BT10) lets you play music from your smart devices through the keyboard's high-quality sound system.

Sound Source

The unique characteristics of each instrument are faithfully reproduced for expressive performances.

The AiX Sound Source leverages Casio's advanced technology for highly expressive sound.

Detailed analysis and reproduction of the unique characteristics of acoustic, electric, and electronic instruments allows for highly realistic tones.

Tones

Carefully curated selection of 61 tones that offers a wide variety while also ensuring you can quickly and easily find the right sound.

Tones of staple instruments that include acoustic pianos, electric pianos, organs, and clavinetts.

CASIO CLASSIC TONES that feature iconic sounds from Casio's rich history of instruments that are popular with many musicians such as the CZ-101, VZ-1, and VL-1.

ADVANCED TONES utilises the maximum potential of the AiX Sound Source, for highly expressive sounds derived from extensive analysis of various instruments including vintage instruments from famous songs.

Acoustic System

Powerful and immersive sound, all produced from within a compact body, thanks to the Horizontal Bass-Reflex System and the 6.5 W+6.5 W amplifiers.

Volume-Sync EQ maintains the presence of the low-end sounds and clarity of the high-end sounds, even when played at low volumes.

Surround sound function that offers expansive, rich sound with added width and depth at the touch of a single button.

Intuitive usability with easy to use controls focused on enhancing the playing experience.

Instant access to various functions thanks to a button layout that is designed for immediate and intuitive use.

Effortlessly stylish design that seamlessly blends into your interior living space.

Compact size for easy portability. It's 258 mm deep and 1,140 mm wide, weighing just 5.3 kg, which

gives you more options for when and where to play it.

The speaker net features a unique mixed colour-texture fabric.

Minimalist layout that features only the essentials — keys, speakers, and a minimal number of buttons.

Available in two colours, white or black, to match your own personal style and home décor.

Touch Response — add intensity and rich expression to each note you play.

Tone Memory — store all your favourite tones and settings for instant recall.

Layer Function — expand your performance range by layering two tones.

Metronome — help keep in time during practice and performance.

MIDI Recorder — record your performances and play them back.

Phones / Output Jack (stereo mini phone jack [mini TRS phone]) — enjoy playing in private, away from the rest of the world.

Wireless MIDI & Audio Adapter (WU-BT10) (Optional)

Wireless integration to connect to your smart devices for audio playback and MIDI data transmission.

The CASIO MUSIC SPACE app enables easy management of settings such as changing tones directly from your smart device to create a seamless playing experience.
