PRO-JECT E1 BT Walnut AT3600L

The
E1

from Pro-Ject Audio Systems is the first E-Line turntable, aiming to deliver a great sound experience on a limited budget, hand made in Europe. It doesn't matter if you are a beginner, returnee or experienced vinyl fan. The E1 won't disappoint you! Our Plug & Play design with pre-adjusted tracking force and anti skating by our experienced technicians in the factory provides you the best settings for your turntable. Just lean back

and enjoy your favourite records. The new E1 is available in three different versions to fit everyone's needs. All three models are equipped with an 33/45 RPM electronic speed switch.

The stylish CNC-machined composite fibre plinth, available in high gloss black, satin white or walnut finish, is carefully manufactured to ensure there are no hollow spaces inside. The lightweight and low friction 8,6" aluminium tonearm is optimized for the high quality Audio Technica AT 3600 L cartridge and will bring out its maximum potential. The new ABS Polymer main platter is strengthened with purpose-designed ridges in order to create an ideal, anti- resonant platform for your vinyl. To protect your E1 from dust, you will also find an elegant acrylic dustcover with adjustable hinges in the box. Boasting premium materials, stylish aesthetics and a rich, lively sound, the extensive development process has ensured that there has been no compromise in the sound performance despite such an affordable price.

The E1 BT adds wireless connectivity to the built-in phono preamplifier. Connect your turntable wirelessly via the BT 5.2 transmitter to your BT speaker, -headphones, or -amplifier.

In the box:

- E1 with Audio Technica AT 3600 L cartridge
- Gold-plated RCA Phono Cable (1,23m)
- Felt mat
- Dust cover
