

ABLETON Move

Šifra: 19096
Kategorija proizvoda: Kontroleri
Proizvođač: Ableton

Cena: 62.280,00 rsd

make it the ideal companion for on-the-go music creation, and its battery gives you up to four hours of use on a single charge.

Create faster than you can overthink

Catch the first flashes of inspiration as quickly as they come, and keep the momentum going with Move's simple workflow. Mix and match ideas, see what works and what doesn't. With Move, it's easier than ever to outpace your inner critic.

Four flexible tracks

Turn any or all of Move's four tracks into a drum kit, sampler or synthesizer, and create rhythms and patterns with its powerful step sequencer.

Play video: An image of someone playing Ableton Move's drum kit

16 pitches for drums

Break out of the standard drum layout and turn any sample into a bassline or melody by transposing single drum hits to different pitches.

Ready to play

Move's high-quality instruments, effects and samples are easy to access and tweak to your liking. When you start a new set, Move will load up four random instrument presets. See if they inspire you, or switch them out for new sounds.

Play video: An image of someone out in a city using the built-in microphone to record sounds from the street

Free sampling

Found a sound you like? Plug in your phone or use the built-in mic to record it, then turn it into a new beat or melody.

Sound selections

Move comes with all the sounds you need to make a track. Choose from over 1500 samples, presets and drum hits from Ableton's sound design team, plus special collaborations with BNYX, DECAP, L.Dre, Sound Oracle and more.

Zoomed in top-down view of the Move screen, it reads 808 Oracle Hit which is a melodic sampler kit

Add some color

Bring more depth and texture to your sounds with Move's built-in audio effects, including a reverb, delay

ABLETON Move

Trust your instincts

Move helps you capture your best ideas whenever they appear. Pick it up, find new sounds and make fast decisions about what feels right in the moment. Follow your intuition wherever it leads you. Standalone and portable

Move's built-in processor, speaker and microphone

and saturator.

Explore now, refine later

Move is about getting into the flow and seeing where it takes you. Create, rework and combine ideas until something clicks, then head to Live to finesse or add finishing touches.

Move includes Live 12.1 Intro.

Find out more about Live >

Play video: See how to work with tuning systems in Live

Move's Wi-Fi connectivity means you can easily transfer Sets to Live and Note with Ableton Cloud and Move Manager.

Create and perform with Live

Move is the ultimate compact MIDI control surface for Ableton Live, thanks to tight integration with Live's interface and workflow.

Connect and play

Plug in headphones, external speakers, microphones and other devices through Move's 3.5 mm stereo ports. Move can also send or receive MIDI via its USB-A port.

Tactile control

Shape sounds with nine touch-sensitive, endless rotary encoders, and play notes, beats, samples, and clips with 32 backlit pads. Each pad responds to pressure independently, letting you add more movement and depth to your tracks.
