# Reloop Mixtour Pro

Šifra: 19123
Kategorija prozivoda: DJ Kontroleri
Proizvođač: Reloop

## Cena: 56.280,00 rsd

## Features

High-quality, ultra-portable, all-in-one four-deck DJ controller with audio interface

Professional solution for clubs and festivals developed in close collaboration with DJ & producer Laidback Luke

Seamless integration for the award-winning Algoriddim djay Pro software with patented Neural Mix™ technology

Integrated 4x Out USB sound card with 24-bit D/A converters ensuring premium sound quality and low latency

USB-C design (bus-powered) with optional power delivery support (45W)

4-deck control: dedicated LED indicator for active decks 3 and 4

Supports Algoriddim's revolutionary Crossfader Fusion™ feature for seamless transitions delivering a perfect mix

Neural Mix™ pad & EQ mode for real-time isolation of drums, instruments, and vocals of any song

Electroplated bi-polar sound filters (LPF/HPF) with LED indicator

8 performance pads with RGB lighting

Split pad mode to assign 4 performance pads to each deck

Single pad mode to assign all 8 pads to a single deck

8 performance modes individually selectable per deck: Hot Cue, Bounce Loop, Pitch Cue, Instant FX, Auto Loop, Sampler, Saved Loops and Neural Mix™

Plug-and-Play: unlocks key features of Algoriddim djay Pro on all available platforms[2]

FX section for selecting and controlling effects for each deck

2 parameter buttons for setting the effect parameter

2 large electroplated toggle switches (FX paddles) with Hold & On position for burst triggering or constant effect activation

Effect status easily visible via FX-On LEDs

Large electroplated Dry/Wet controller for controlling the effect level

Rubber-coated transport section with four control buttons per deck (Play/Pause, Cue, Sync, Manual Loop)

Laidback Loop mode: instant looping with just one button (In/Out/Exit)

Intuitive deck lighting: the transport section illuminates in a different colour according to the active decks

Shift/mode control for 2nd-layer functions such as Auto Loop, Key Match, Pitch Bend, and Key Shift

Millions of tracks are available on demand within Algoriddim djay Pro via the Apple Music, Tidal, SoundCloud, Beatport and Beatsource streaming services[1]

Dedicated controls for main output level, headphone volume, and cue mix

LED chain input signal for level indication

Aluminium browse encoder and load buttons for quick and easy track navigation and loading

Gain and 3-band EQ per channel

Headphone cue buttons per channel

45mm Ultra Glide line faders and crossfader

Gold-plated RCA outputs and 3.5mm headphone jack

Brushed aluminium top panel with high-gloss acrylic plate inlay

Flat design with high-quality components and large, non-slip feet

Multi-platform support compatible with smartphones, tablets, or laptops

MIDI-compatible

Side Kensington lock for theft protection

Optional Premium Modular Bag XT for safe transportation and a solid base to raise the Reloop Mixtour Pro to club setup height

Incl. USB-C to USB-C cable and instruction manual

## Technical Data

Inputs: USB (type C) DC IN port (max. PD 45 W)
Outputs: Main RCA (unbalanced), headphone 3.5 mm stereo jack, USB-C data port
Sound Card Resolution: 4x Out USB sound card with 24-bit D/A converters
Minimum Power: USB-C DC IN 5-20V / 20W
Main (RCA) Output
  Level: 18±1dBu
  THD+N: < 0.03%
  S/N: < -100dB
  Frequency Res.: ±2dB / 20~20KHz
  Separation: > 100dB
Headphone (3.5mm TRS) Output @ 32ohm Loading
  Level: 4±1dBu
  THD+N: < 0.03%
  S/N: < -100dB
  Frequency Res.: ±2dB / 20~20KHz
  Dimensions: 129(W) x 310(D) x 51(H) mm
  Weight: 956 g
  Minimum system requirements: Please refer to the manufacturer's specifications for the system requirements of your DJ software.
  Incl. USB-C to USB-C cable and instruction manual

## Mixing with up to four decks

Despite its small size, the Mixtour Pro is capable of supporting four-deck mixing with its powerful and intuitive controls. Thanks to the illuminated transport section with dedicated coloured LEDs, users are always informed of whether decks 1 and 2 or decks 3 and 4 are currently active. The aluminium browse encoder and designated load buttons allow for efficient library navigation and instant loading of tracks.

## Professional design & FX control

The Mixtour Pro's two channel strips with their trusted design are fitted with all the important controls for a modern DJ setup. Each channel features an electroplated bi-polar sound filter (LPF/HPF) with a dedicated LED indicator, in addition to gain and three-band EQ. The convenient FX paddles allow the user to trigger effects in bursts via FX Hold mode or to apply them indefinitely via FX On mode. A large, electroplated dry/wet knob controls the intensity of the effect, while the two dedicated parameter buttons offer complete control over the effect parameters. The lower performance area is fitted with 45mm Ultra Glide crossfader and line faders, for the smoothest operation in the mix.
rossfader Fusion™

The Mixtour Pro is also the first DJ controller to support Algoriddim djay Pro's revolutionary Crossfader Fusion™ feature. DJs are now able to select from a range of creative transition styles that are automatically applied when mixing from one song to another, delivering a perfect mix every single time with the simple slide of the crossfader.

## Flexible performance pad section

Eight performance pads with RGB lighting provide users with more creative options with a wide range of modes including Hot Cue, Bounce Loop, Pitch Cue, Instant FX, Auto Loop, Sampler, Saved Loops and Neural Mix™. Furthermore, all eight pads can be assigned to control one channel in single pad mode, or four pads can be assigned to a channel each via split pad mode.

## Full control: the transport section

The Mixtour Pro's sophisticated transport section enables a smooth and efficient workflow. It features four rubberized buttons for each channel to control Play / Pause, Cue, and Sync respectively, while the signature "Laidback Loop" button independently offers instant looping (In/Out/Exit) with a single control. This transport section also offers secondary layer functions to control Auto Loop, Key Match, Pitch Bend, and Key Shift. The transport buttons also illuminate in 2 different colours representing decks 1 and 2 or decks 3 and 4, respectively, keeping the DJ clearly informed when performing.
SB-C design for multi-platform & device support

The Reloop Mixtour Pro provides impressive compatibility options when pairing it with a device and platform. A smartphone, tablet or computer can all be conveniently bus-powered thanks to the modern USB-C architecture. The unit also houses a second USB-C PD port, capable of up to 45W to efficiently daisy-chain a power supply, allowing the device and controller to be powered simultaneously. Algoriddim's djay Pro is available for iOS, iPadOS, macOS, Windows, and Android for even more cross-platform versatility.
