Cena: **129.480,00 rsd.**

The Altea-715A is a high-powered model from D.A.S. Audio's Altea Series. It's equipped with a 1500 Wpeak Class D two-channel amplifier that provides extended bandwidth, wide dynamic range and exceptionally low distortion. Digital Finite Impulse Response (FIR) filters are used in the signal processing of the Altea-715A systems. The DAScontrol™ interface allows users to configure voicing presets, input/output levels, EQ modes, delay and source mixing by way of a high-end 24-bit quality DSP and LCD screen on the rear of the cabinet. The remote control and monitoring APP DASlink™ of the Altea-700 series powered systems allows users to wirelessly stream music from mobile devices in high-definition stereo.

The high-performance transducers include the D.A.S. 15FV4 loudspeaker, which provides accurate low frequency reproduction with a deep, powerful bass. High frequencies are handled by the brilliant M-28 FEM optimized compression driver with 1" exit providing exceptional performance and smooth reproduction.

The Altea-715 passive systems allow users to choose the powering option they prefer. Designed for use with external amplification and outboard DSP, they benefit from the enclosure features and high-power transducer components of the Altea 700 powered versions.
