

Marshall SN20H Studio JCM 900 Head

Šifra: 19484

Kategorija proizvoda: Head Gitarska Pojačala

Proizvođač: Marshall

Cena: 141.480,00 rsd

Practical features for Studio and stage

The two channels of the Marshall SN20H Studio 900 Head come with separate controls for reverb and volume, allowing the integrated spring reverb to be set versatile for clean and gain settings. The sound can also be adjusted via the 4-band EQ with controls for bass, middle, Treble and presence, while other features are available for practical use: In addition to a serial effects loop for integrating external pedals, the supplied footswitch can be integrated to change channels via the footswitch input. Two separate line outputs are available for recording sessions, while the output level can be reduced from 20 watts to 5 or 1 watt. For additional routing options, there are also four speaker outputs from 4 ohms to 16 ohms, allowing additional speakers to be connected to the amplifier.

Features:

Manufacturer: Marshall

Power Output (Watt): 20

Stereo: No

Tubes (Poweramp): 5881

Number of Channels: 2
