Proizvođač: Citronic

Cena: 41.880,00 rsd

Neolith is a self-contained active sub & column speaker system that delivers superb sound quality for medium to high volume PA applications. Maintaining a minimal footprint, the compact sub cabinet is loaded with a high power 10" low frequency driver, and is also home to the powerful class-D bi-amp module. For mid and high frequency reproduction, the column speaker has a quartet of high power full-range drivers, which have Neodymium magnets to maximise response and efficiency at these frequencies. Sub and column are assembled using a specially-designed mounting pole, which also serves to connect the column speakers to the amplifier output. This makes setting up and breaking down a matter of seconds for mobile work. The amplifier is also governed by a DSP circuit, offering 5 distinct tonal profiles that may be selected for different sound duties. Two input channels can each accept a line input with one switchable to Mic level, with the other also serving as an input for the inbuilt Bluetooth receiver. Convenience and ease of use are the key benefits of Neolith, providing power and great sound quality without fuss or frustration.
