

Rega ND3 Cartridge - MM gramofonska zvučnica

Šifra: 19835
Kategorija proizvoda: Igle i Glave
Proizvođač: Rega

Cena: 24.280,00 rsd

Each Nd3 is meticulously hand-made by our highly skilled technicians. The stylus profile is a high quality elliptical profile manmade polycrystalline diamond, which is bonded to a round titanium shank. The design uses brand new generator geometry with perfect symmetry to achieve accurate channel balance. The Nd3 also has an optimised pole gap for superior linearity and cross talk characteristics, this provides a far wider soundstage than the previous models. This new cartridge is created with miniaturised parallel coils which are wound in house utilising 38-micron wire with just 1275 turns. This produces a low inductance, low impedance generator giving vastly improved high frequency response. In keeping with our commitment to sustainability, the Nd range is supplied in 100% recyclable packaging.

Key Features

- Bonded elliptical profile stylus
- Aluminium cantilever
- Neodymium magnet
- Unique generator
- Rega 3 point mounting system
- Highly rigid lightweight PPS body
- Handmade stereo cartridge
- 100% recyclable packaging
- Lifetime warranty against manufacture defects

Technical Specifications

Nominal Output Voltage: 5-6mV

Stylus: Bonded Elliptical

Fixing: 3 point fixing

Coils: Miniaturised parallel coils

Window Colour: Red

Tracking pressure: 1.75g
