

Rega ND5 Cartridge - MM gramofonska zvučnica

Šifra: 19834

Kategorija proizvoda: Igle i Glave

Proizvođač: Rega

Cena: 34.680,00 rsd

which are wound in house utilising 38-micron wire with just 1275 turns. This produces a low inductance, low impedance generator giving vastly improved high frequency response. In keeping with our commitment to sustainability, the Nd range is supplied in 100% recyclable packaging.

Key Features

- Perfect elliptical nude diamond profile stylus
- Aluminium cantilever
- Neodymium magnet
- Unique generator
- Rega 3 point mounting system
- Highly rigid lightweight PPS body
- Handmade stereo cartridge
- 100% recyclable packaging
- Lifetime warranty against manufacture defects

Technical Specifications

Nominal Output Voltage: 5-6mV

Stylus: Perfect elliptical nude diamond

Fixing: 3 point fixing

Coils: Miniaturised parallel coils

Window Colour: Clear smoked

Tracking pressure: 1.75g

Rega ND5 Cartridge - MM gramofonska zvučnica

is meticulously hand-made by our highly skilled technicians. The stylus profile is a perfect elliptical nude diamond. This is a true ellipse created by an elliptical grinding process made from polycrystalline manmade diamond. The design uses brand new generator geometry with perfect symmetry to achieve accurate channel balance. The Nd5 also has an optimised pole gap for superior linearity and cross talk characteristics. This provides a far wider soundstage than the previous models. This new cartridge is created with miniaturised parallel coils
