KEY FEATURES
• Q SUB100 has exceptional bass power to cabinet size ratio.
• This subwoofer is more powerful than the previous QB 12 model.
• Digital Signal Processing (DSP) allows easy system and room integration with optimise settings for class-leading, distortion-free performance.
• Clever, dual phase and delay controls allow the fine-tuning of the signal alignments for flexible room placement.
• DSP identifies the input signal and automatically adjusts system gain, enhancing performance regardless of the connected source.
• A low pass filter with frequency adjustment ensures seamlessly integration with any partnering speaker system.
• A custom-designed amplifier module features four digital power amplifier stages that improves efficiency by dissipating less heat, enhances speaker control, and reduces output impedance.
