AH-C120MA Music Maniac™ In-Ear Headphones

Studio Quality Sound Experience From Elegant and Understated Design

Denon's Music Maniac™ AH-C120MA In-Ear Headphones feature 11.5 mm drivers, set in premium hybrid-material housing, are professionally tuned to a Flat EQ to deliver an acoustically transparent music experience. As another step up, they come with an oxygen-free, non-tangle cable, engineered for sound purity featuring an in-line 1-button remote and microphone for easy control of select Android and Apple devices and other smartphones*, as well as clear phone conversations and voice recognition operations. Audio enthusiasts often complain about the noise generated from the cable rubbing against their chest when they're moving. Denon's specially designed Radial Cascade Damper system reduces cable-transmitted vibration noise, enabling you to enjoy studio-quality music on the go. The set contains silicon ear tips (S, M, L) plus a pair of Comply™ Foam TX-400M ear tips for best-possible individual fit.

Key Features

11.5 mm drivers professionally tuned to a Flat EQ to deliver an acoustically transparent music experience

Hybrid Metal Housing eliminates resonance of bass-enhanced music

Oxygen-Free cable with in-line 1-button remote (for Android and Apple devices) and microphone for voice recognition operations
