Šifra: 13124

Kategorija proizvoda: AV Pojačala i Risiveri

Proizvođač: DENON

Cena: **29.880,00** rsd.

Front, back and centre - be surrounded by sound

Soundbars and bases offer a great step-up over your TV's speakers but they still can't beat the immersive sound of an AV receiver like this Denon AVR-X250BT. With 5.1 channel Dolby TrueHD and DTS-HD Master Audio, you get surround sound that's pin-sharp in detail and totally enveloping - just like at the cinema.

Class-leading quality

Denon is one of the world's leading audio companies, so it's no surprise to find the AVR-X250BT sounds so good. At the heart of this Denon AV receiver is discrete, high-current amplification. By using discrete (separate) components rather than an integrated chip (IC), quality components can be used for a more detailed and lower distortion sound. Packing 70 watts per channel, the AVR-X250BT delivers the dynamics your favourite movies deserve.

HDR and HLG compatible

With a total of five HDMI inputs, the AVR-X250BT has your system covered. Three of the inputs are compatible with HDCP2.2 protection and advanced formats, including HDR and HLG (Hybrid Log-Gamma). This means you get excellent compatibility with the latest UHD Blu-ray players and HDR TVs.

Plug in your music and older AV sources

It's not just the latest video sources that are catered for, the AVR-X250BT has your audio gear and older AV kit covered, too. There are two analogue and two optical digital inputs - ideal for connecting a games console, set-top TV box, CD player and other source.

Bluetooth music streaming

With Bluetooth on-board you can stream music wirelessly. Simply pair up with your device and stream your stored music and favourite streaming services such as Spotify and Deezer.

Quick Select sound

Sometimes the sound you prefer from your TV is different to that from playing films on your Blu-ray player. Denon have thought of this and provide four Quick Select buttons for just this scenario. Program your ideal audio and EQ settings for each of the four inputs and recall them when you change inputs - at the touch of a button.

Get the sound of cinema in your own home - with the powerful Denon AVR-X250BT.
