

DENON DCD 50

Šifra: 2813
Kategorija proizvoda: CD Plejeri
Proizvođač: DENON

Cena: **41.880,00** rsd

Akcijna cena važi za gotovinsko i virmansko plaćanje

Perfect Match with PMA-50

Featuring the same high quality styling and finish, the DCD-50 is the perfect partner for the PMA-50 digital integrated amplifier. The compact chassis features deluxe finishes including soft aluminum matte with bright silver tone accents and glossy and matte black surfaces.

Vertical or Horizontal Placement

When desktop or shelf space is at a premium, the DCD-50 can be vertically positioned alongside or above the PMA-50. The 4 feet are easily removable by hand, and the chassis side features caps covering 4 screw holes. Simply remove the existing caps and screw in the feet. Then, put the supplied 4 silver caps into the original bottom screw holes and you are all set.

Clear View OLED Display with Dimmer

The OLED display shows the CD's total tracks and total time, as well as the track number and track time, and the song title, artist name and album name (depending on the disc), along with icons for random mode, repeat 1 and repeat all modes, and a folder icon for data discs.

Selectable Auto PlayAutomatic Standby Option

You also have the ability to activate the Auto Standby function, which will automatically put the DCD-50 in standby mode after 30 minutes of inactivity, saving energy and the environment.

Versatile Disc Playback

The DCD-50 plays music CDs and can also play data CDs, including CD-R and CD-RW discs with MP3 and WAV audio tracks.

Ergonomic Remote Control

The supplied remote control features an ergonomically-designed layout that includes a cursor keypad, number keypad and dedicated function buttons such as random, repeat, info and program. You can control both DCD-50 and PMA-50 with a supplied single remote.

The display automatically rotates to match the installation orientation.

The dimmer function features 3 levels of display brightness, adjustable via the remote control. When paired with the PMA-50, you can adjust the display brightness of both units at the same time.

High Resolution D/A Conversion

For connection to other audio components that do not have a digital coaxial input, the DCD-50 features a high quality D/A conversion block with 32-bit/192-kHz D/A converter that delivers wide dynamic range, along with extremely low noise and distortion.
