

## TANNOY Eclipse Two Black Oak

# TANNOY Eclipse Two Black Oak

Šifra: 10800

Kategorija proizvoda: Podnostojeći Zvučnici

Proizvođač: Tannoy

Cena: **15.000,00** rsd

The Eclipse Two boasts an 18.9 litre cabinet, constructed from heavyweight fibreboard and braced to reduce cabinet colouration. Fitted with the new Eclipse 1.1" HF driver and a single Eclipse 5" mid/bass driver, the larger ported cabinet allows the drivers to best engage with the room for an altogether larger and more fulfilling sound. With power handling up to 200 Watt peak, high 88 dB/watt efficiency and frequency response from 44 Hz to over 32 kHz, the Eclipse Two is capable of creating fine music irrespective of genre or recording format.

With its two-part plinth for additional stability, robust gold-plated speaker terminals and close tolerance components throughout, the Eclipse Two redefines the performance standard for entry-level floorstanding loudspeakers. With its satin black oak finish, subtle trim detailing and removable grilles, the Eclipse Two looks as good as it sounds.

### Cabinet

Tannoy's proven heavyweight fibreboard cabinet design is employed in the Eclipse series. Internally braced to minimise cabinet colouration, they can deliver tighter, more tuneful bass. The cabinets are also rear ported to assist deep bass reproduction and keep the front baffle's clean lines.

### Woofers

The 5" Eclipse mid/bass driver offers unrivalled midband clarity and low frequency performance in its class. The cone is crafted from a light, stiff multi-fibre enriched paper pulp, coated to improved detailing and offering exceptional transient response to give rhythmic music realistic drive and punch.

### Tweeter

The 1.1" silk dome tweeter chosen for its accuracy and detail is coated with a layer of nitro-urethane damping which serves to move the 'break-up' frequency much further outside the human range of hearing. Providing high frequency performance which is supremely accurate with smooth top-end extension out to over 32 kHz

### Crossover

Eclipse crossovers include laminated core inductors for exceptional musical detailing. Tannoy's unique differential materials technology compound is used to damp micro vibrations on the polypropylene capacitors, further enhancing Eclipse's musicality and communication.

### Finish

The Eclipse range is finished to exceptional standards throughout. Finished in dark yet cool satin black oak and equipped with robust gold-plated speaker terminals, Eclipse leaves other budget loudspeakers in the shade.

### Plinth

A dedicated plinth is provided on floorstanding models providing stability and ensuring fast and taut low frequency performance. This is further enhanced with adjustable floor spikes for precise levelling of the speaker cabinet without damage to carpets.

<b>Performance</b>	
<b>Recommended amplifier power (Watts RMS)</b>	15 - 90
<b>Continuous power handling (Watts RMS)</b>	45
<b>Peak power handling (Watts)</b>	200
<b>Sensitivity (2.83 Volts @ 1m)</b>	88 dB
<b>Nominal Impedance (Ohms)</b>	8
<b>Frequency response (-6 dB)</b>	44 Hz - 32 kHz
<b>Drive Units</b>	
<b>Dual Concentric High frequency</b>	28 mm (1.1") Nitro-u system
<b>Dual Concentric Low frequency</b>	127 mm (5") Multi- fi
<b>Crossover</b>	
<b>Crossover Frequency</b>	3.2 kHz
<b>Crossover Type</b>	Passive low loss 2nd
<b>Construction</b>	
<b>Enclosure type</b>	Rear ported reflex
<b>Volume</b>	18.9 l (0.67 cu. ft)
<b>Dimensions (H x W x D) (inc plinth)</b>	909 x 269.6 x 287 mm (35.8 x 10.6 x 10.9")
<b>Net weight</b>	11.5 kg (25.4 lbs)
