and 96 kHz.

GIGAPORT HD+ provides ASIO 2.0 drivers for professional audio mixing and playback under Windows XP and Windows Vista / 7 (both 32-bit and 64-bit). The hardware is also CoreAudio compatible and natively works under Mac OS X even without the installation of a special driver.

This makes GIGAPORT HD+ perfect for digital DJs on the road working with notebook computers. Simply use your favorite DJ software and GIGAPORT HD+'s eight outputs as up to 4 different stereo channels, enabling you to mix, cue and add effects! Monitor and pre-listen to your signals via the two built-in headphone outputs. GIGAPORT HD+ of course also works on your desktop computer and is compatible with all important professional audio software applications like Cubase, Sonar or Logic. The hardware also works with consumer programs such as DVD playback software. To get started right away, GIGAPORT HD+ comes bundled with a license of the DJ software Deckadance LE from Image-Line Software.
