Šifra: 7718
Kategorija proizvoda: USB Zvučne kartice
Proizvođač: ESI

Cena: 11.880,00 rsd

ESI UDJ6 not found or type unknown

UDJ6 is a new professional level 24-bit USB audio interface featuring 6 totally independent output channels.

Two stereo outputs (channels 3 to 6) are provided with RCA connectors on one side of the small and compact bus-powered interface, in its stylish aluminium case. The other side features a stereo headphone output for 1/4" stereo connection (providing channel 1 and 2 signals).

Of course, every output channel can be accessed totally independent from within any modern DJ application for Mac OS X or for Windows. This compatibility is provided by the included ASIO 2.0 drivers for Windows XP / Vista / 7 / 8 (32-bit and 64-bit) and the full CoreAudio support for Mac OS X.

All this makes UDJ6 perfect for digital DJs on the road working with notebook computers. Simply use your favorite DJ software and mix your tracks the way you like it! Monitor and pre-listen to your signals via the built-in headphone output. UDJ6 of course also works on your desktop computer and is compatible with all important professional audio software applications as well.

UDJ6 comes bundled with a license of Deckadance LE from Image Line Software, a powerful DJ software that was written by DJs for DJs - simply start DJing with the separate output channels of UDJ6!

Features

24-bit / 96kHz D/A converter

2 output channels with 1/4" TRS headphone output compatible with Windows XP and Windows Vista/7/8 supporting ASIO 2.0, WDM, MME (using ESI's EWDM driver technology)

compact and portable design with around 7 cm x 6 cm x 2 cm

6 independent output channels

4 output channels with RCA connectors for output 3/4 and 5/6

compatible with Mac OS X and supported by the native CoreAudio USB audio support from Apple, no special driver installation required

includes license of Deckadance LE from Image-Line Software
