

FOCAL Sphear S Black

Šifra: 12456

Kategorija proizvoda: In-Ear Slušalice

Proizvođač: Focal

Cena: **15.480,00 rsd.**

Thanks to their unbeatable performance in this price category, Sphear S are the most accomplished in-ear headphones to date, the most comfortable and the most generous for getting the most out of your music, wherever you are. In this age of "High-Resolution" and CD quality audio files, through its spherical design and its preservation of Focal's acoustic signature, Sphear S provides an original and unique solution for those passionate for high resolution sound.

10.8mm electrodynamic drivers for rich, natural sound

Bass-reflex system for ultra-realistic bass

Nomad Comfort

Light and practical, discreet and attractive, Sphear S in-ear headphones are the fruition of the close collaboration between designers and engineers aiming to conciliate complex constraints related to miniaturisation with innovative and sophisticated solutions. A job for the true audiophile, this collaboration resulted in this simple and pronounced bulbous design of the ear pieces secured by a stainless steel ring and grille for

increased robustness, reliability and aesthetics.

High Resolution Sound

The spherical design of Sphear's ear-pieces makes it possible to have a larger driver than usual. The 10.8mm multi-channel transducer, one of the biggest in its category, and the Bass Reflex system provide extended frequency response in the low end and ultra realistic bass. Additionally, the bass level on Sphear S has been slightly increased for mobile use in noisy environments.

Quality Materials

Our research and development teams have perfected a Mylar driver whose specific shape and ridging were designed to avoid deformation and distortion. Equipped with an acoustic chamber with port for providing remarkable neutrality, such astonishing tonal balance has never been heard before from this family of headphones.

Impedance	16 Ohms
Sensitivity	103dB
THD	<0.3%
Frequency response	20Hz – 20KHz

Driver	10.8mm Mylar electro-dynamic
Microphone	Omnidirectional
Weight	0.1kg
