

FOCUSRITE Scarlett 2i4 2nd Gen

FOCUSRITE Scarlett 2i4 2nd Gen

Šifra: 12696
 Kategorija proizvoda: USB Zvučne kartice
 Proizvođač: Focusrite

Cena: **17.110,00** rsd

The interface is designed to operate handily at resolutions and sample rates of up to 24-bit/192 kHz, and its combination input jacks render it suitable for tracking instruments with much in the way of headroom and little in the way of distortion. A MIDI input and output round out the unit, allowing you to manipulate your DAW by means of a MIDI-controller, and thus, to program software instruments, to automate audio via knobs or faders, and to instantiate other commands.

In addition to its two balanced monitor outputs, the Scarlett 2i4 offers a volume-controllable headphone output on the front. Metal gain controls and a red metal chassis provide a durable construction which can be taken on the road. The 2i4 provides a round-trip latency as low as 2.74 ms at 96 kHz, allowing you to record and monitor processed sound sources in real time.

This interface includes versions of Pro Tools and Ableton Live, as well the Focusrite Red Plug-In Suite (AAX, Audio Units, VST) which delivers modules based on the classic Focusrite Red 2 EQ and Red 3 Compressor hardware. Also included is the Softube Time and Tone Pack for further sonic exploration within your DAW.

Notable Features

2 Scarlett mic preamps offering headroom and minimal distortion

2 instrument inputs designed for high-level pickups

Sample

Headphone output with gain control

Cue-m

Low latency and direct monitoring

2x 1/4

MIDI I/O connectivity, ideal for sending/receiving MIDI notes from a MIDI controller

Durab

Powered by USB

Includ

Includes additional plugins and loops

Ablet
