Using microphones flown from the ceiling to record music or speech in places of worship, conference rooms, or on theater stages is becoming more and more popular.

A 10-m (33-ft.) special cable that is treated specially to reduce twisting to a minimum even if the temperature varies and a spring steel hanging clamp for precise microphone alignment will keep the microphone securely in its position.

A switchable LED ring helps the sound engineer to check system function during the soundcheck.

Available capsule modules for HM 1000: CK 31, CK 32, CK 33, CK 47, CK 80.
