iSolution technology allows synchronisation of different types of intelligent iSolution fixtures via either a custom-built iLead DMX-512 controller or in stand-alone mode. iLead (Integrated Lighting System) allows fixtures to be linked and work in synchronisation, regardless of type, including iLead-equipped scanners, moving heads, and colour changers. The iLead controller can also remotely set the DMX addresses of the fixtures. All units are also controllable via any universal DMX-512 controller. Conversely, the iLead controller is a universal DMX-512 controller and can be used with non-iSolution fixtures.

Control: DMX 512 - 11/8 channels (switchable)
