### IsoAcoustics ISO-200Sub

IsoAcoustics Inc. is pleased to introduce the next evolution of our specialized line of speaker stands for the audio professional, music hobbyist, audiophile, and music lover. The new ISO Series of speaker stands provide superior acoustic isolation and enhance the sound clarity of any speakers including studio monitors, home theatre systems and sound reinforcement.

With a lower profile and new contemporary design, the ISO Series of stands positions your studio closer to the supporting surface or meter bridge, and the new redesigned isolators moves the acoustic performance another step forward.

IsoAcoustics ISO Series speaker stands are built with a unique, patented isolation technology that provides a high degree of isolations and manages the speaker's energy to deliver authentic, uncoloured sound. This next generation of speaker stands effectively eliminates energy transfer into the supporting surfaces. Bass becomes tighter, overall imaging is enhanced and your speakers are enabled to perform to their full potential. Following the same design philosophy as the ISO-L8R Series, these isolation stands provide 14 variations of height and tilt adjustment to optimize the placement and performance of studio monitors by getting the tweeters in the correct alignment with the listening position.

Whether you're a pro mixing in the studio - a musician creating in a home project environment - or an audiophile who appreciates every nuance of music and sound - you'll hear and appreciate the difference with the ISO Series speaker stands. It's simply the best investment you can make for superior audio.

#### IsoAcoustics ISO-200 Sub Subwoofer Stand Features:

Lets you properly position and isolate your subwoofer for more accurate performance

Better focus and deeper, tighter bass

Oversize design accommodates large subs, use two for extra-large units

Isolation-enhancing design

#### Properties of IsoAcoustics ISO 200SUB:

Application area: Studio

max. inclination angle: 6.5 degrees

Dimensions: 200 x 250 mm

weight: 1,40 kg

height: 12,5 cm

max. load capacity: 34 kg

Colour: black
