Cena: **47.940,00** rsd

ONKYO R-N855 B

Breakthroughs

Creating a small housing capable of delivering such a spacious sound is the result of considerable research and development. In cabinet construction, baffle shaping and port design, LS50 breaks new ground with patent-pending technology. All this is made possible by KEF's leadership in modern research (including techniques such as Finite Element Analysis and Computational Fluid Dynamics*). LS50's unique technology offers by far the cleanest, most accurate studio-grade performance of any mini monitor.

Breakthroughs

Uni-Q®

LS50 employs revolutionary technology developed for Blade, KEF's latest flagship loudspeaker. Using the very latest Uni-Q driver, specifically designed for this model, LS50 radiates an extremely large listening sweet spot and delivers a remarkably fast, clean sound. And, because LS50 neither adds nor subtracts a single sound, it's effortlessly natural and accurate too.

Review : LS50 - The Absolute Sound 07/2013

"The KEF LS50 is one of the most all-around-satisfying little speakers I've reviewed. The build, the execution are exemplary. It delivers the kind of performance that deserves to be on a pedestal. It has an incalculable coolness factor that makes it a breath of fresh air. The LS50 also says you can't teach an old box new tricks?"

Reviewers Choice award

"The LS50 is nothing short of a masterpiece of a minimonitor, priced so that a pair -- and probably should, if only to know how great a small speaker can be. It's a side as it's been on KEF's -- the LS50 is one of their best speakers yet, and one of the best as it ages, this company seems to get better and better."
