Independent test lab certified IP65
Aluminium grille and mounting bracket, 1/4"-20 threaded inserts for mounting options
Stainless steel / brass hardware
Rotatable logo

The top of the range KEF Ventura 6s are larger, outdoor, weather resistant speakers which are a great way to get impressive sound in the garden, by the pool or on the patio.

The Venturas feature sealed, UV treated, high impact ABS composite cabinets and rust-proof powder coated aluminium grilles and brackets making them true 'all weather' speakers. The cabinets house a 160mm long-throw woofer and a 25mm fluid-cooled aluminium tweeter which, working together, allow the speakers to deliver an impressively full, detailed and open sound even at higher volumes. Spin your favourite party track and these capable speakers will soon have your patio rocking. The integrated brackets also feature up to 180º of lateral rotation, so even once they've been fitted, you can position the speakers for the best sound.

If you want high-quality sound outside your home, installing a pair of KEF Ventura 6 speakers is a great way to get it.
KEF’s outdoor speakers are tough. Come rain or shine, they deliver a rich, high precision sound.
