## BEYERDYNAMIC M 99

Šifra: 9790  
Kategorija proizvoda: Sa Velikom Dijafragmom  
Proizvođač: Beyerdynamic

**Cena: 41.880,00 rsd**

### Large diaphragm dynamic microphone for instruments and on-air broadcasting

Vocals  
Radio announcers  
Instruments  
Kick drum

The M 99 is a dynamic moving coil microphone of studio quality. The tailored frequency response suits

many applications from instrument miking to on-air broadcasting. The beyerdynamic TG-X technology used in the M 99 features a strong neodymium magnet system and a mass reduced special Hostaphan® diaphragm to give the microphone a powerful reproduction with excellent transient characteristics. The frequency response is extremely linear and guarantees audio quality which has until now, only been achieved by using high-quality condenser microphones.

The frequency select switch at the base of the microphone allows three settings of equalisation, linear and two optimised settings for vocals and instrument miking. A second switch is for presence accentuation. This allows further adjustment for close miking techniques or kick drum miking. The hypercardioid polar pattern helps to eliminate feedback in live applications and allows a good separation between different instruments. The microphone can operate at very high sound pressure levels without loss of sound quality and virtually no distortion. The M 99's die cast casing is made of aircraft grade aluminium and finished with an attractive metallic varnish.

### Features

Extremely linear frequency response  
Hypercardioid polar pattern  
Rugged construction

Switchable presence accentuation and equalisation for bass drum  
Integrated elastic suspension

### Technical data

Price category	Professional
Transducer type	Moving coil (dynamic)
Polar pattern microphone	Hypercardioid
Microphone frequency response	30 - 18,000 Hz
Dimensions	Length: 163 mm; Shaft diameter: 23/25 mm; Head diameter: 56 mm
Net weight without packaging	526 g
