**"eight years after the original Naim Uniti redefined what a one-box hi-fi system could do, Naim went back to the drawing board to completely reinvent the Uniti line-up. And in doing so, it's made Uniti arguably the most future-proof - and most jaw-droppingly desirable - music platform money can buy"**

### Bringing Uniti to Life

Conceived and built from the ground up by their engineers and designers in Salisbury, England, Uniti remains true to their core design principles. From the finned aluminum heatsinks (inspired by their Statement flagship amplification system) to the brushed black aluminum casing, the new illuminated signature volume control and the beautifully lit base - every minute detail has been considered to deliver a beautiful aesthetic packed with features and technology whilst achieving reference-level sound quality. Uniti is a true masterpiece of industrial design.

### Local Storage

Uniti Nova allows you to plug in an external USB-connected drive or SD card so you can store up to 20,000 tracks and play them back through your all-in-one player. You can also use your Uniti Nova to serve music to up to four network-connected players in a multiroom system.

### Under the Skin of Uniti Nova

Uniti Nova really lives up to its name with some outstanding new technology which really sets it apart from the rest of the range. Its circuitry features the highest quality discrete components, a massive toroidal transformer for an exceptional sound, superior isolation, our new signature volume control, more inputs than you can shake a stick at and an 80 watt power per channel power amplifier to boot. Uniti Nova is as good as an all-in-one player can get.

Purposeful Materiality not found or type unknown

### Purposeful Materiality

Uniti has been impeccably crafted with materials chosen to be in complete service of the sound. The extruded aluminium heat sinks that run down the length of the product extract heat to maximise thermal stability for increased longevity and sonic performance. The beautifully brushed aluminium top plates are CNC-fabricated for absolute precision and

provide a perfect enclosure for the delicate components inside.  
Precision Volume Control

Image not found or type unknown

### **Precision Volume Control**

At the heart of Uniti is an audiophile volume control which adjusts level in the analogue domain to a premium digital resolution. Its ultra-smooth rotation and illumination is inspired by their reference amplification system, Statement. The lit volume segments are reflected in the same fashion on Uniti Nova's intuitive remote control and will adjust accordingly on the top surface ring if the volume is changed remotely. We've also hidden the Bluetooth antenna here for a seamless aesthetic.  
Give Your Music Some Colour

Image not found or type unknown

### **Give Your Music Some Colour**

With the Uniti range we wanted to deliver total connection to the user's music collection. A highly polished full-colour 5" LCD display provides rich images of album artwork and content. The screens have proximity sensors and will therefore wake up as someone approaches the machine to display music metadata, audio input information and more. There is also a selection of front-panel buttons including Favourites, Stop and Play.  
Revolutionary New Streaming Platform

Image not found or type unknown

### **Revolutionary New Streaming Platform**

Uniti has been developed

with a completely new, extremely powerful and versatile streaming board. This innovative new platform is much more powerful than its predecessor, has masses of memory, will adapt to new technology effortlessly and seamlessly integrates with other network-connected Naim systems, including the Mu-so wireless music system. New and improved Naim app

Image not found or type unknown

### **New and improved Naim app**

The new intuitive Naim App gives you effortless control over individual or multiple Uniti products. You can access all of your music, including your favourite radio stations, streaming services and playlists, explore artist discographies and biographies. Furthermore, you can now update your system wirelessly with a single tap. The new app also allows you to control both Naim streaming products and Uniti Core. Glass display and intuitive remote control

Image not found or type unknown

### **Glass display and intuitive remote control**

Uniti Nova features a full-colour 5" LCD glass display with a proximity sensor that wakes up when you approach it, accompanied by a bidirectional intelligent remote control that works in harmony with the volume control on your all-in-one player. Giving you complete freedom of movement, Uniti is a joy to use.

## Class A/B Amplification

Image not found or type unknown

### **Class A/B Amplification**

Driving this digital innovation is an 80-watt amplifier with technology derived from our most iconic and best-loved integrate amp, the NAIT. The filter sections in Uniti Nova are made using the finest-quality through-hole film capacitors and discrete transistors. The power amplifier sections are now twice as fast and run from linear power supplies with substantial transformers and we've also installed premium Burr Brown DACs to deliver the unique Naim pace, rhythm and timing.

#### A Closer Look at Uniti's Digital Brain

Image not found or type unknown

### **A Closer Look at Uniti's Digital Brain**

New Uniti Nova features an incredibly powerful, phenomenally accurate fourth-generation 40-bit SHARC DSP processor. This DSP chip removes jitter (timing errors) and, using Naim's RAM buffer (first used in the Naim DAC and NDS), oversamples the audio 16 times to feed the premium Burr Brown DACs, resulting in a smoother and more precise sonic performance.

#### State-of-the-art Wi-Fi

Image not found or type unknown

### **State-of-the-art Wi-Fi**

New Uniti all-in-one players include the very latest Wi-Fi technology. The superior Wi-Fi processor supports 2.4 and 5 GHz, alongside a much better internal buffer and memory – Uniti Nova will store up to five minutes' worth of data,

which results in far fewer dropouts. The Wi-Fi aerials (one on either side of the product for optimum range) are integrated behind a slot machined into the heat sink, a patent-pending system that provides robust connectivity without the need for an external aerial.

## Uniti System

### Uniti System

Whatever the source, their revolutionary new Uniti players combine seamless digital technology with analogue soul for a sound that's unmistakably Naim. Play, stream, rip and store entire music collections in flawless high-resolution. Then use their custom-designed software to bring out every note of your music with true high-fidelity sound. New Uniti also gives you the option to sync up to

six Units  
systems  
or other  
Naim  
streamers  
and  
play  
music  
from  
any  
source  
in  
multiple  
rooms  
simultaneously.  
Or play  
different  
music in  
every  
room.
