"We're not the least bit surprised that the Star turns out to be so capable. Our experience of other Uniti products gave us a pretty good idea of Naim's talent in this arena. The Star is a great addition to the range, and if you need CD replay is the obvious choice."

What Hi-Fi says type unknown

What Hi-Fi says...

"eight years after the original Naim Uniti redefined what a one-box hi-fi system could do, Naim went back to the drawing board to completely reinvent the Uniti line-up. And in doing so, it's made Uniti arguably the most future-proof - and most jaw-droppingly desirable - music platform money can buy"

Best Hi-fi One-box Solution type unknown

Best Hi-fi One-box Solution

"The Class AB amplifier delivers a fast and powerful sound with oodles of emotion and expressive tonality for total listener engagement. The clue's in the name. This all-in-one is a sonic Star."

Bringing Uniti to Life

Conceived and built from the ground up by their engineers and designers in Salisbury, England, Uniti remains true to their core design principles. From the finned aluminum heatsinks (inspired by their Statement flagship amplification system) to the brushed black aluminum casing, the new illuminated signature volume control and the beautifully lit base - every minute detail has been considered to deliver a beautiful aesthetic packed with features and technology whilst achieving reference-level sound quality. Uniti is a true masterpiece of industrial design.

Local Storage

Uniti Star allows you to plug in an external USB-connected drive or SD card so you can store up to 20,000 tracks and play them back through your all-in-one player. You can also use your Uniti Star to serve music to up to four network-connected players in a multiroom system.

Under the Skin of Uniti Star

This all-in-one player packs a heavy punch. Since Uniti Star includes a CD player alongside streaming and amplification technology, our engineers had to pay special attention to preserving thermal stability and decreasing interference between components. The custom-integrated CD drive also doubles as a ripper, making Uniti Star the most versatile all-in-one in the range.

Purposeful Materiality type unknown

Purposeful Materiality

Uniti has been impeccably crafted with materials chosen to be in complete service of the sound. The extruded aluminium heat sinks that run down the length of the product

extract heat to maximise thermal stability for increased longevity and sonic performance. The beautifully brushed aluminium top plates are CNC-fabricated for absolute precision and provide a perfect enclosure for the delicate components inside.

Precision Volume Control

Image not found or type unknown

Precision Volume Control

At the heart of Uniti is an audiophile volume control which adjusts level in the analogue domain to a premium digital resolution. Its ultra-smooth rotation and illumination is inspired by their reference amplification system, Statement. The lit volume segments are reflected in the same fashion on Uniti Star's intuitive remote control and will adjust accordingly on the top surface ring if the volume is changed remotely.

We've also hidden the Bluetooth antenna here for a seamless aesthetic.

CD Ripping

Image not found or type unknown

CD Ripping

Uniti Star offers bit-perfect CD ripping to create files that you can either play back or serve to any UPnP™-capable streamer on your home network and then can store them locally on a USB-connected device or SD card, either in WAV or FLAC lossless format. Uniti Star uses a unique ripping engine to ensure that the ripped data represents a faultless replica of the CD, even with badly damaged discs.

Revolutionary Streaming Platform

Image not found or type unknown

Revolutionary Streaming Platform

Uniti has been developed with a completely new, extremely powerful and versatile streaming board. This innovative new platform is extremely powerful, has masses of memory, will adapt to new technology effortlessly and seamlessly integrates with other network-connected Naim systems, including the Mu-so wireless music system. Improved Naim App

Image not found or type unknown

Improved Naim App

The new intuitive Naim App gives you effortless control over individual or multiple Uniti products. You can access all of your music, including your favourite radio stations, streaming services and playlists, explore artist discographies and biographies. Furthermore, you can now update your system wirelessly with a single tap. The new app also allows you to control both Naim streaming products and Uniti Core.

Glass Display

Image not found or type unknown

Glass Display

Uniti Star features a full-colour 5" LCD glass display with a proximity sensor that wakes up when you approach it, accompanied by a bidirectional intelligent remote control that works in harmony with the volume control on your all-in-one player. Giving you complete freedom of movement, Uniti is a joy to use.

Class A/B Amplification

Image not found or type unknown

Class A/B Amplification

Uniti Star uses a powerful 70-watt A/B-class amplifier with technology taken from our iconic NAIT integrated amps. We've also installed the largest power supply possible as well as the finest-quality SMD circuitry to deliver the unique Naim pace, rhythm and timing.

A Closer Look at Uniti's Digital Brain

A Closer Look at Uniti's Digital Brain

New Uniti Star features an incredibly powerful, phenomenally accurate fourth-generation 40-bit SHARC DSP processor. This DSP chip removes jitter (timing errors) and, using Naim's RAM buffer (first used in the Naim DAC and NDS), oversamples the audio 16 times to feed the premium Burr Brown DACs, resulting in a smoother and more precise sonic performance.

State-of-the-art Wi-Fi

Image not found or type unknown

State-of-the-art Wi-Fi

New Uniti all-in-one players include the very latest Wi-Fi technology. The superior Wi-Fi

processor supports 2.4 and 5 GHz, alongside a much better internal buffer and memory – Uniti Star will store up to five minutes worth of data, which results in far fewer dropouts. The Wi-Fi aerials (one on either side of the product for optimum range) are integrated behind a slot machined into the heat sink, a patent-pending system that provides robust connectivity without the need for an external aerial.

Uniti System

Uniti System

Whatever the source, their revolutionary new Uniti players combine seamless digital technology with analogue soul for a sound that's unmistakably Naim. Play, stream, rip and store entire music collections in flawless high-resolution. Then use their custom-designed software to bring out every note of your music with true high-fidelity sound. New Uniti also gives you the option to sync up to
