NOVATION MiniNova - Sintisajzer

Šifra: 11682
Kategorija prozivoda: Sintisajzeri
Proizvođač: Novation

Cena: 50.880,00 rsd

main
Image not found or type unknown

MiniNova is a compact, super-cool studio and live synth with the same sound engine as its big brother; UltraNova. It comes with 256 incredible onboard sounds that you can tweak with five knobs, or totally warp with eight 'animate' buttons. It has up to 18 voices with as many as five synth effects on each sound. MiniNova also has an onboard VocalTune™ effect as well as a classic vocoder so you can recreate iconic vocal sounds from hip hop, urban and electronic music.

Small synth, big sounds

Don't let its size fool you. MiniNova is the latest in the 'nova' range of synths dating back to the legendary Supernova series. It has the same incredibly powerful sound engine and synth effects as the Novation UltraNova which means it is capable of creating dirty-fat bass synth sounds, soaring leads, lush pads and vintage synth sounds. All this in a 37 mini-key form with a USB port and MIDI i/o so you can hook it up to your laptop and control your music software or connect it to another keyboard or sound module.

Classic & brand-new vocal effects

MiniNova takes vocal effects one-step further. As well as a vocoder, it has VocalTune. This means you can talk into the mic and play the tune you want your voice to follow on the keyboard recreating those classic hip hop / urban vocal effects. You can also run your voice through MiniNova's effects engine, adding reverb, distortion, chorus/phase, gator compression or EQ. This doesn't need to be limited to your voice; there is an input into which you can plug a guitar or any other instrument and give it the same treatment; effects or vocoder.

The 'Animate' performance mode

123
Image not found or type unknown
Switch to 'Animate' mode and press one of the 8 backlit buttons (whilst playing the keyboard) to trigger awesome performance functions

Jam with the Arpeggiator

123
Image not found or type unknown

Switch to 'Arpeggiator' mode to jam with arpeggiator rhythms in realtime. The 8 buttons act like an arpeggiator step sequencer so you can switch steps in and out!

Editing software included

Editing sounds in such a powerful synth can be overwhelming, so we've created a software application **that** gives you visual access to the synth engine. The MiniNova Editor works as a plug-in within your DAW or music software. You can fully edit MiniNova using the hardware; the software just makes it **easier** to see what you are doing.

The Synth Engine and effects

MiniNova has an enormously powerful sound engine and synth effects, unheard of in a micro synth. There are 14 conventional waveforms to choose from (square, sine, sawtooth, pulse, triangle and combinations), 36 wavetables and 20 digital waveforms. Each of the 3 oscillators (per voice) have density/detune for fattening up sounds, virtual sync and 'hardness' - which acts as an additional lowpass filter. There are 14 filter types (and you can run 2 simultaneously), 6 envelope generators, 3 LFOs and 20 modulation slots where you can link modules of the synth engine together to shape sound. MiniNova can add up to 5 effects to each sound including distortion, reverb, chorus/phase, delay, compressor, EQ and Novation's unique gator effect.

Instant editing and performance control

perform The 'Perform' section enables you to access the synth and effects engines by switching between 6 positions to assign 4 knobs, giving you instant access to 24 sound-bending parameters.

Specifications

In the Box

USB cable
Power supply
User Guide
Goosneck Microphone

Included Software

MiniNova Software Editor
MiniNova Patch Librarian
Ableton Live Lite
Novation Bass Station softsynth
Loopmasters sample pack (1GB)

Synth engine

Up to 18 note polyphony (dynamic voicing)
Mono-Timbral

Per patch

3x oscillators
1x noise generator
2x ring modulators
Waveforms include:
Square, sine, tri, sawtooth, pulse, 9x saw:pulse combinations.
20x digital waveforms
36x wavetables

Filter types

2x filters per patch
low pass no resonance 6dB per octave
low pass 12dB

low pass 18dB
low pass 24dB
band pass 6:6
band pass 6:12
band pass 12:6
band pass 6:18
band pass 18:6
band pass 12:12
high pass no resonance 6dB per octave
high pass 12dB
high pass 18dB
high pass 24dB

Modulation sources:

20 modulation slots per patch
6x envelope generators
3x LFOs
Aftertouch
Velocity
Key scaling/track
Mod wheel
Expression pedal

Total of 66 Destinations including:

Oscillator pitch, pulse width, wavetable index, level and sync
Filter cutoff, resonance, envelope settings
Effects parameters and send levels
Recursive modulation (modulating modulation sources themselves)

5 effects slots per patch

Distortion – up to 2 instances
Compressor – up to 2 instances
Chorus/Phase – up to 4 instances
Delay – up to 2 instances
Reverb – up to 2 instances
Gator
EQ

Misc

VocalTune
12 band vocoder
Arpeggiator – 33 patterns
Realtime Arp rhythm editing function
Chord function – lock up to 10 notes
Patch storage - up to 384 on hardware (ships with 256 factory patches)

Hardware:

Utility, display and patch select controls

16 character custom LCD
1x large detented patch select encoder
1x patch sort switch
1x volume dial
1x detented data encoder
5x navigation/utility buttons
2x patch navigation buttons

Keyboard/performance controls

Pitch wheel (LED lit)
Modulation wheel (LED lit)
37 note keyboard with velocity
4x smooth edit/performance pots
1x large smooth filter pot
1x six position parameter selector switch
6x parameter indicator LEDs

8x three-colour, back-lit animate/arpeggiator/favourite patch-select buttons
2x animate/arpeggiate LED indicators
1x back-lit 'hold' button
1x animate/arpeggiator/favourite patch toggle switch
1x 'favourite' patch select button
1x arpeggiator tempo control pot
1x arpeggiator tempo indicator LED
2x back-lit arpeggiator control encoders
2x back-lit octave select buttons

Inputs, Outputs, rear panel

XLR dynamic mic input
1x ¼” jack inputs
2x ¼” jack outputs
1x ¼” jack headphone output
Sustain pedal on ¼” jack input
MIDI in/out
12 volt power input
USB/DC/off power switch
USB port (MiniNova can be powered via USB)
Kensington Lock port

Dimensions

Length: 560mm
Height: 75mm
Depth: 250mm
Length: 22.04"
Height: 2.95"
Depth: 9.84"

Weight

2.52kg
5.55lb

Cene su informativnog karaktera. Prodavac ne odgovara za tačnost cena iskazanih na sajtu, zadržava pravo izmena cena. Ponudu za ostale artikle, informacije o stanju lagera i aktuelnim cenama možete dobiti na upit. Plaćanje se isključivo vrši virmanski - bezgotovinski.
