

ONKYO TX SR252(b)

Šifra: 11077
Kategorija proizvoda: AV Pojačala i Risiveri
Proizvođač: Onkyo

Cena: **33.480,00** rsd

It serves as a next-gen 4K/60 Hz-ready hub for all your devices (game consoles, media streamers, VCRs, and BD players) and sends everything to your TV through a single cable. It can even be set up to switch on and off automatically with your regular TV remote.

But best of all, its fully discrete analog amps immerse you in 100 W/Ch of clear and dynamic surround sound, whether it's from your regular TV shows, DTS-HD Master Audio™-encoded Blu-rays, an AM/FM radio station, or MP3s played via the front USB.

So if you're set on fixing your flatscreen sound, do it properly and do it affordably with this compact A/V solution.

Onkyo TX-SR252 At A Glance:

HDMI® 4 In / 1 Out for UltraHD

Lossless High-Definition Movie Soundtracks
Easy Connection Guide on Back Panel

TrueHD
Front

HDMI® 4 In / 1 Out for UltraHD

All HDMI terminals support the latest TV displays with four inputs handling HDCP 2.2 copy protection and 4:4:4 color space encoded in content from movie studios, broadcasters, and streaming services for next-generation UltraHD.

Enjoy Lossless High-Definition Movie Soundtracks

The TX-SR252 can decode Dolby® TrueHD and DTS-HD Master Audio™—two lossless Blu-ray formats that deliver a soundtrack identical to the studio master, so you're hearing it exactly as it's meant to be heard.

5.1 Channels Take Entertainment to the Next Level

Five-channel surround-sound presents the art of cinema in a way single-point-source audio systems can't match. With speakers positioned all around you, movies, games, TV programs, and music are enhanced with immersive realism.

True Power from Discrete Amplifiers

Rather than using low-quality digital IC amplifier circuits found in some competing products, the TX-SR252 has proper analog amp circuits with discrete output stages for high driving power and low distortion.

Easy Connection Guide on Back Panel

Connections to speakers and external devices are illustrated and clearly labeled on the back panel.

Front USB Port for MP3, WMA, and AAC Playback

Plug in a compatible flash drive filled with music in MP3, WMA, or AAC format and use the remote controller and TV display to navigate through your collection. Kick back and soak up the awesome sound!

HIGHLIGHTS

100 W per Channel
HDMI® 4 In / 1 Out (4K UltraHD / HDCP 2.2 / 4:4:4 Color Space)
True Driving Power from Discrete Amp Circuits
USB Port for MP3/WMA/AAC Playback
Quality 192/24-bit DAC

AMPLIFIER FEATURES

100 W/Ch (6 Ω, 1 kHz, 0.7% THD, 1 Channel Driven, IEC)
Discrete Output Stage Circuitry

Five-Channel Analog Amplifiers

PROCESSING FEATURES

HDMI Support for 4K/60 Hz, 3D, Audio Return Channel, DeepColor™, x.v.Color™, LipSync, Dolby® TrueHD, DTS-HD Master Audio™, DVD-Audio, Super Audio CD, Multichannel PCM, and CEC
Dolby® TrueHD and DTS-HD Master Audio™ Decoding
192 kHz/24-bit DAC for All Channels
SACD Playback via HDMI (2.8 MHz, 2 Channels)
Direct Mode

CONNECTION FEATURES

4 HDMI Inputs and 1 Output
USB Port (Front) for Music Playback via Flash Drive
2 Composite Video Inputs and 1 Output
2 Digital Audio Inputs (1 Optical and 1 Coaxial)
3 Analog Audio Inputs (3 Rear)
Subwoofer Pre-Out
Headphone Jack

OTHER FEATURES

A/V Sync Control (Up to 500 ms in 5 ms Steps at 48 kHz)
HDMI Passthrough Function
Tone Control (Bass/Treble)
3-Mode Display Dimmer (Normal/Dim/Dimmer)
30 FM/AM Random Presets
Full-Function RI (Remote Interactive) Remote Control
Sleep Timer
AM/FM with RDS
