and test tones. The 3-band EQ on every channel and dual multi-band graphic EQ with selectable In/Out switches give you maximum control over your mix.

Features:

800W 12-Channel Powered Mixer with Graphic EQ & DFX

Eight balanced mic/line input channels with inserts

3-band EQ on all input channels

32-bit digital effect processor with 100 preset programs plus tap delay effects, test tones and foot switch jack

Two stereo AUX returns, each can be routed to AUX 1 & 2 sends (effect to monitor)

Grouped +48V phantom power for broad application

PFL on each input and AFL on each output

Zone 2 output for side fill or another PA system

One Speakon-type jack and two 1/4" jacks per channel for speaker connection

Molded protective cover to avoid scratching and marking when on the road

Mains power switchable between 115 VAC and 230 VAC

PHONIC Powerpod 1860 Plus

Phonic's Powerpod 1860 Plus powered mixer is built into a compact and durable molded cabinet with removable cover and sturdy carry-handle. Each Powerpod 1860 Plus has a built-in 800 Watt stereo amplifier which is both bridgeable and patchable. Super Hi-Z inputs allow for the addition of guitars and other instruments. The mixers feature onboard DFX, our own 32/40-bit digital effects processors with 100 preset programs, plus tap delay effects

2 x 400W / 4 ohms stereo power amplifier (bridgeable and patchable)

Two stereo line input channels with additional stereo RCA jacks

Stereo 7-band graphic EQ assignable to main or aux 1

Four AUX sends (AUX 1/2 are pre-fader and EFX 1/2 are post-fader)

Stereo RCA inputs and outputs for external CD or MP3 players

Mono output for extra zone filling or as subwoofer processing source

Standby switch to mute channels 1 through 12 for playing music between sets

Headphone/control room output with rotary level control

Low weight achieved by high-efficiency switching power supply

Rugged metal main chassis with integrated handle for increased versatility
