Powerpod 620 Plus

The Phonic Powerpod Plus Series of mixers are powered mixers built into a compact and durable molded cabinet. Each Powerpod Plus has a built-in dual channel amplifier which is bridgeable and patchable. Super Hi-Z inputs allow for the addition of guitars and other instruments. The mixers feature onboard DFX, our own 32/40-bit digital effects processors with 16 preset programs and parameter control for each effects main parameter. The 3-band EQ on every channel and dual multi-band graphic EQ with selectable In/Out switches give you maximum control over your mix.
