

## Biamp PR1000R - Radio prijemnik

Šifra: 2332  
Kategorija proizvoda: Tjuneri  
Proizvođač: Biamp

**Cena: 32.760,00 rsd**

### Biamp PR1000R - Radio prijemnik

#### PR1000R TUNERS

The PR1000R is a professional AM/FM RDS tuner. The unit has a brushed aluminum front, and is loaded with professional features. It is easy to integrate in rack mounted professional audio distribution systems, stereo HiFi systems, multi-room audio systems and computer controlled audio systems.

This tuner can be controlled by RS232 and infrared, and comes with an IR handheld remote and FM antenna . For professional use, removable 19-inch rack ears are included.

The PR100R has an output attenuator on the rear panel, and galvanically separated antenna and RS-232 connectors. The RDS function offers information about program type, song name identification and radio station identification.

The PR100R is highly recommended for use with Concept1. It has an attractive clear dot matrix gas display, a very low power consumption and it is designed for 24/7 reliability. Best of all : this unit will convince your customers to choose a professional system and avoid cheap, unreliable consumer HiFi sets !

FM tuning range : 87.5 - 108 MHz

AM tuning range : 522 - 1611 kHz

AM sensitivity (26 dB S/N) : 38 µV

FM channel selectivity (400 kHz) : 70 dB

Audio bandwidth ± 1.5 dB : 30 - 15 kHz

Stereo separation : >50 dB @ 1 kHz

Power consumption : max 10 VA

Rack ears : included - removable

Galvanically separated antenna and RS232 connectors

Tuner with adaptive noise suppression

Weight : 2.8 kg

Presets : 40

FM sensitivity (26 dB S/N) @ 75 ohm unbalanced : 1.1 µV

FM channel selectivity (200 kHz) : 50 dB

Audio S/N ratio FM : > 78 dB

THD : <0.1%

Power supply : 230 VAC/50 Hz

Power consumption standby mode : 1 watt

Adjustable audio output level

Active FM antenna signal buffer

Dimensions L x W x H : 484 (430) x 270 (245) x 44 mm
