

Q ACOUSTICS 7000i Slim White 5.1 komplet 5 zvučnika+aktivni vufer - Paket

Šifra: 13361
Kategorija proizvoda: Surround Zvučnici
Proizvođač: Q ACOUSTICS

Cena: 143.880,00 rsd

Uses the 7060 Subwoofer, which at only 150mm deep is the slimmest, standalone subwoofer Q Acoustics have ever produced

Speakers and subwoofer are available in contemporary matte black and white finishes

Deep bass extension and a powerful output belie its compact size

Big Sound Big Sound

7000i Series is a beautifully styled speaker range where the focus is on getting the biggest sound from the smallest, best-looking speakers. This is done by moving as much of the bass as is possible into a subwoofer, enabling us to make much smaller speakers for the front and surround channels, each with their mounting method as part of the clever design.

Mounting Options

Q ACOUSTICS 7000i Slim White 5.1 komplet 5 zvučnika+aktivni vufer - Paket

5.1 Slim system has been designed for those who want a big sound from a very compact set of speakers, particularly the subwoofer, which at 150mm (6") deep is the slimmest they have produced so far. The Left, Right, Centre and Rear speaker enclosures are attractively designed D-shaped aluminium castings for low resonance. Its precision soundstage, powerful dynamics and rich deep bass create the perfect, discreet home cinema system.

Based on the award-winning 7000 series speaker components, constructed using precision aluminium cast enclosures. Add more Left Right speaker pairs (7000LRi) for 7.1, Atmos or to use as extension speakers in an adjacent room

Delivered in a single carton for easy storage, shipping and taking home

Mounting

Options

The supplied speaker table stand, which also double as wall bracket can be replaced with optional floor stands with uprights, which conceal the speaker cables and armoured glass, transparent bases as not to conceal the floor covering. An optional wall bracket allows the 7060 to be wall mounted and a steel mesh grill protects the 200mm driver from accidental damage.

Low Frequency Satellite Speakers

Low Frequency Satellite Speakers

It is of great importance is that there is enough overlap between the speakers and subwoofers bandwidth to ensure that they crossover seamlessly without any gaps or peaks. This has been done by giving the 'satellite' speakers enough low-frequency extension that they can even be used on their own.

Perfect For Wall Mounted Screens

Perfect For Wall Mounted Screens

Once mounted, the left, right and centre speakers

can be angled to enhance their performance. The terminals are cleverly built into the mount and speaker cables can be hidden from view, making these ultra-discreet speakers an excellent choice to partner a wall mounted screen.

7000LRi

Enclosure Type	2-Way Sealed Enclosure
Enclosure Material	Aluminium
LF Units	2 x 3" Long Throw
HF Unit	1" Ring Radiator (N
Power Handling	15 - 100W
Sensitivity	85 dB @ 2.83V (Fre
Impedance	6 Ohm
Frequency	95Hz - 20KHz
Overall Dimensions (HxWxD)	240mm x 100mm x
Weight	1.6 Kg

7000Ci

Enclosure Type	2-Way Sealed Enclosure
Enclosure Material	Aluminium
LF Units	2 x 3" Long Throw
HF Unit	1" Ring Radiator (N
Power Handling	15 - 100W
Sensitivity	85 dB @ 2.83V (Fre
Impedance	6 Ohm
Frequency	95Hz - 20KHz
Overall Dimensions (HxWxD)	115mm x 207mm x
Weight	1.6 Kg

7060S

Enclosure Type	Infinite Baffle
Enclosure Material	MDF
LF Units	8" (200mm) High-E
Power Handling	150W Class-D
Frequency	35Hz - 200Hz
Overall Dimensions (HxWxD)	324mm x 480mm x
Weight	11.0 Kg
Power	100V-240V 50/60H

Warranty	2 Years
