7070Si Series 8 Inch Subwoofer

The 7070Si is a compact subwoofer that, like its matching 'satellite' speakers in the new 7000i system, delivers a class leading sonic performance. The powerful 150W Class D amplifier drives a 200mm low frequency driver as capable of faithfully reproducing the speed and 'twang' of a double bass as it is the prolonged, earth moving rumble of a 'block buster' explosion.

The 7070Si's revolutionary 'Internal Firing' design makes it less dependant on room position to achieve optimum performance. For ultimate convenience, the 7070Si can even be wall mounted using an optional bracket.
