proper use of a cable like this, you won't be disappointed. It's brilliantly detailed, yet avoids the tonal brightness.

The new cable is a fusion of QED's high end 'Genesis' and 'X-Tube' technologies, combining them into a new miniature format and bringing high end cable philosophies into a mid-prices product for the first time. This breakthrough means 'Revelation' boasts an overall impedance, and a dissipation factor, significantly below that of a conventional speaker cable with the same cross-sectional area.

The result is a speaker cable that exudes breathtaking neutrality, allowing good hi-fi and home cinema equipment to perform at its very best.

The cable is an attractively finished, standard 'figure 8' configuration, with each of its ten 99.999% silverplated multiple cores visible through a flexible 5.0mm diameter, clear polyethylene outer sheath. For ease of assembly and to ensure correct speaker 'phasing', the 'positive' cable is clearly marked and the whole is easily stripped into the recommended QED 'Airloc' speaker plugs.
