Kategorija proizvoda: DVS Scratch Sistemi

Proizvođač: Reloop

Cena: 4.680,00 rsd

Play

External and internal mixer mode

Reloop Play
Image not found or type unknown

USB DJ soundcard with an outstanding sound quality in pocket size

USB-DJ-audio interface with 24-Bit sound quality

With this small but powerful interface Reloop presents one of the smallest DJ soundcards that can be found on the market - with an outstanding 24 bit sound quality. Special hi-gain outputs allow an extremely pounding club sound catering for lowest latencies while spinning, granted by the USB 2.0 ASIO/CORE driver technology.

Elaborate connecting possibilities

Thanks to the elaborate connecting possibilities, Reloop Play offers two play modes. On the one hand there is the external mixer mode: with it, it is possible routing two separate stereo channels to an external mixer - this mode will be appreciated by all professional Traktor users. The second mode is called the controller mode: In this case a master output is routed to the sound system and it is possible to connect headphones directly to the interface - this mode is especially appropriate for laptop DJs without further hardware. Both stereo channels' volume can be comfortably adjusted via separate controllers. The signal status LEDs allow a visual monitoring so that everything remains in view and under control. Small, professional and always present: Plug&Play.

Most compact format

Technical Data

Minimum system requirements PC:

Windows XP (SP3), Win7
(32 bit/64 bit)
at least Pentium III / Intel
Core Duo, 1 GHz (NO
AMD processors
recommended!)
at least 512 MB RAM

Minimum system requirements Mac:

OS X 10.5/10.6

Intel Core Duo family
(only Intel MACs)

at least 512 MB RAM

Dimensions: 80 x 20 x 65
mm

Weight: 85 g

Incl. ASIO driver CD, USB
cord

Features

Ultra portable 4-channel
DJ audio interface with
24 bit resolution

Hi-speed USB 2.0 with
low latency ASIO/CORE
Audio drivers

Hi-gain outputs for
powerful club sound
2 stereo RCA outputs for
use with an external DJ
mixer

Stereo 1/4" headphones
output for use with
software mixer

2 play modes: External
mixer mode (2 separate
channels can be routed
to an external mixer),
controller mode (1x
master out is routed to
the sound system and
headphones can be
connected directly to the
interface)

Volume controls and
signal status LEDs for
direct, visual monitoring

Separate volume
controllers for channels 1
& 2, master &
headphones respectively

USB bus powered

Burglar-proof:

Kensington lock

Low latency ASIO/Core

Audio drivers

Compatible with Mac OS

X and Windows

XP/Vista/7
