RELOOP RMX-33i

Šifra: 10589
Kategorija proizvoda: DJ Miksete
Proizvođač: Reloop

Cena: **46.680,00** rsd

SMART TABLET SPLIT CONNECTION

An iPad split input on the rear of the mixer makes it possible to include an iPad, Android tablet or smartphone directly into your DJ set-up via 3.5 mm jack to the RMX-33i.

The supplied iPad split cable can divide the audio signal into two separate mono channels or delivers one stereo output.

This connection method means DJ apps with split-cue function (like DJAY by Algoriddim) can be utilised, as can the stereo output from production or sampler apps.

INSTANT SOUND COLOUR EFFECTS

The RMX-33i has four high-quality digital Sound Colour effects built-in. White noise, Filter (low and high-pass), Bit Crusher and Gate can be assigned to the dedicated Instant FX potentiometers at the push of a button. The effects can be used for any channel and are modulated via a large, ergonomic bi-polar potentiometer to achieve exactly the sound you want.

ISOLATOR / CLASSIC EQ

The instantly recognisable mixer layout has a three-band EQ section that can be easily set to 'Kill' (isolator mode) or 'Classic', to suit any individual mixing style.

FLEXIBLE FADER SECTION

The line- and cross-fader curves are adjustable on the mixer surface, so smooth mixes and hard cuts can be carried out quickly and changed mid-routine. In addition to curve adjustment, the cross-fader and line-faders can be set to auto-start or crossover-reverse to suit the needs of your performance.

MULTIPLE CONNECTION POSSIBILITIES

With a total of ten inputs and five outputs, you will always find the right connection for any analogue or digital source. The output section benefits from both RCA and XLR outputs for trouble-free connection of the master signal to any PA system.

INNOFADER READY

The RMX-33i's high-quality crossfader can also be upgraded with the new Reloop Innofader by Audio Innovate for a truly unrivalled performance at a very appealing price.

RMX-33i: 3+1 Digital FX Mixer with iPad Split Connection

TECHNICAL DATA

Inputs	2 Phono 7 Line 1 Combo-Mic
Outputs	1 XLR 2 RCA 2 Headphones
Frequency Range	20 Hz - 20 kHz
