

ALLEN & HEATH XONE:23

ALLEN & HEATH XONE:23

Šifra: 11494
Kategorija prozivoda: DJ Miksete
Proizvođač: ALLEN & HEATH

Cena: 47.880,00 rsd

ADDITIONAL OVERVIEW:

At the heart of the mixer is the renowned analogue Voltage Control Filter (VCF) system offering Low-Pass and High-Pass filters, frequency sweep and 'mild to wild' resonance control. There is also an FX loop to connect to third party FX units, which route back in through the filter system.

The 2 stereo channels feature independent level controls for each input enabling up to four stereo sources to be simultaneously routed to the mix, as well as the dedicated send and return system for external FX.

Styled on the Xone:DB4, the Xone:23 includes soft touch, backlit controls, light-piped meters and a distinctive new shaped steel faceplate. The mixer can also be upgraded with the latest Innofader for enhanced scratch performance, available as an accessory.
