

SARAMONIC SR-XLR4C

Šifra: 13012

Kategorija proizvoda: Wireless Sistemi

Proizvođač: Saramonic

Cena: **14.280,00 rsd.**

The **Saramonic SR-XLR4CS** is a “plug-on” wireless transmitter with a locking XLR connector for the SR-WM4C Wireless System that makes any microphone wireless. Perfect for use with a dynamic handheld interview microphone, such as the Saramonic SR-HM7 handheld microphone (sold separately). The SR-XLR4C also provides phantom power, so you can make any condenser microphone wireless — such as the Saramonic SR-TR1 shotgun microphone on a boompole, pistol grip, or stand. In addition to microphones, it can also be transmit line-level signals, such as the output of a mixer or PA system.

The SR-XLR4C is built tough with sturdy metal construction and features a locking XLR connector to secure to the microphone. It operates on four selectable channels, so if you encounter interference, you simply press a button to switch to another channel. It can be muted with a short press of a button, which is useful when the person holding the mic needs privacy. When it’s time to shoot again, a dedicated light will be flashing to remind you that it’s muted.

A fantastic addition to the Saramonic SR-WM4C Wireless System that will provide users with added flexibility and near limitless microphone options to transmit wirelessly.

Transmits any XLR microphone wirelessly to the SR-WM4C Wireless System

+48V phantom power for condenser microphones and accepts microphone or line-level audio sources
