ONKYO A-9030 Black

ONKYO A-9030 Black

Šifra: 8179

Kategorija proizvoda: Integrisana Pojačala

Proizvođač: Onkyo

Cena: 35.880,00 rsd

**Svaki ONKYO uređaj
imaće garanciju na teritoriji
Republike Srbije ukoliko je**

kupljen kod ovlašćenih dilera:

**PLAYER PLUS, Svetogorska 9, 11000 Beograd
PLAYER PLUS, Sarajevska 68-70, 11000 Beograd

Onkyo je japanski proizvođač potrošačke elektronike, specijalizovan za kućne bioskope i Hi Fi audio opremu. Nastao je 1946. godine pod imenom OSAKA DENKI ONKYO KK. Današnja korporacija obuhvata INTEGRA I INTEGRA ISTRAŽIVAČKE DIVIZIJE kao i glavni ONKYO brend, pod rukovodstvom NAOTO OTHSUKI. Sama reč "ONKYO" može da se prevede kao "HARMONIJA ZVUKA".

Još u ranim fazama istorije korporacije, Onkyo se razvijao kao inovator i plasirao u sam vrh audio tehnologija, postavši sinonim savršenstvu zvuka, kao i visoko kvalitetnim zvučnicima i komponentama.

WRAT (Wide Range Amplifier Technology) for Naturally Vivid Sound

Onkyo developed the WRAT suite of technologies to improve the clarity and character of amplified audio. The technologies work to reduce noise across the frequency range, guaranteeing a clear, balanced, and natural sound. It achieves this by employing a low negative feedback amplifier design, preserving the essential energy and life contained within the recording; using closed ground-loops to cancel unwanted noise from individual circuits; and by enabling high current flows to cancel reflex energy from the speakers.

Innovative Three-Stage Amplifier Circuit Brings Your Music to Life

While some hi-fi makers take a shortcut to amplified audio with the use of cheap all-in-one IC chips, the resulting sound is often compromised once you turn the volume up. Instead, on the A-9030, Onkyo uses the same Three-Stage Inverted Darlington Circuitry technology it uses in its highend A/V receivers and Reference Series hi-fi separates. This innovative circuit topology facilitates high speaker-driving power, reduces distortion, and preserves the buoyancy and expressiveness of recorded music—a unique characteristic of our low negative feedback amplifiers.

Optimal Gain Volume Control Guarantees CleanerSound

Conventional volume-attenuation methods involve initially dropping a signal close to the amplifier's natural noise floor at low volumes. The signal can then become tainted with noise, which subsequently gets amplified along with the signal. Onkyo's Optimum Gain Volume Control Circuitry adjusts the gain so that less than half the typical amount of attenuation is necessary. The signal never comes close to the noise floor, and the result is noticeably clearer sound when compared to conventional amplifier designs.

Phase-Matched Bass Boost for Deeper Bass and a Clearer Mid-Range

From the warm low notes produced by a cello to the deep frequencies of electronic music, a good amplifier should be able to deliver plenty of bass without distorting. Some amplifiers are prone to the effects of phase shifting, which can overwhelm middle frequencies and muddy the overall sound. Our Phase-Matching Bass Boost technology effectively preserves mid-range clarity—allowing vocals and strings to shine while maintaining a smooth, natural bass response at all volume levels.

Discrete Output Stage Circuitry Means Cooler Running Temperatures

A receiver's ability to deliver high power into low impedances is a vital factor in its performance. If the current flow through the amplification circuit is inconsistent, audio quality will suffer. Onkyo stereo

amplifiers feature separate high-quality components at the signal output stage. Discrete transistors help guarantee a consistent, stable supply of current to the speaker system for an open and assured performance, with less chance of distortion and cooler running temperatures.

High-Output Power Supply to Drive Your Speakers

At the heart of all our amplifiers, you'll find a power supply that can maintain or increase output power as required. Musically, this means that you have deep, powerful bass; wide-ranging dynamics; musical peaks that sound composed; and correct timbre and sound staging. When paired with a set of quality loudspeakers, Onkyo amplifiers have the capability to drive them with ease. In the case of the A-9030, you will find a high-output power transformer, two 8,200 μ F capacitors, and a low-impedance bus bar for perfect ground potential. All work in concert to enhance the power and fidelity of your audio sources.

Quality Construction Equals Better Performance

A vital factor in any audio component is its build quality. It's not just about good looks. The build quality of the chassis, the construction techniques used, the electronic parts chosen all combine to shape the outputted audio signal. The A-9030's anti-resonant chassis is designed to isolate the audio signal from any vibrations that may cause

interference during the amplification process. This chassis is superbly

Key Features

- Innovative Three-Stage Amplifier Circuit Brings Your Music to Life
- Phase-Matched Bass Boost for Deeper Bass and a Clearer Mid-Range
- WRAT (Wide Range Amplifier Technology) for Naturally Vivid Sound
- Optimal Gain Volume Control Guarantees Cleaner Sound
- Discrete Output Stage Circuitry Means Cooler Running Temperatures

FEATURES

- 65 W/Ch (8 Ω, 1 kHz, 0.08% THD, 2 Channels Driven, IEC)
- WRAT (Wide Range Amplifier Technology)
- High-Current Low-Impedance Drive
- Two 8,200 μF Capacitors
- Direct Mode
- Aluminum Front Panel
- 5 Analog Audio Inputs and 1 Output
- Subwoofer Pre-Out
- Banana Plug-Compatible Speaker Posts
- RI (Remote Interactive) Remote Control
- Three-Stage Inverted Darlington Circuitry
- Phase-Matching Bass Boost
- Thick, Low-Impedance Bus Bar for Perfect Ground Potential
- Optimum Gain Volume Control
- 1.6 mm Full Flat Chassis
- Tone Control (Bass/Treble/Balance)
- Phono Input (MM)
- Speaker A/B Drive
- Headphone Jack

Amplifier Section

Power Output	65 W/Ch (8 Ω, 1 kHz, 0.08% THD, 2 Channels Driven, IEC)
THD+N (Total Harmonic Distortion + Noise)	0.08% (1 kHz, 1 W Ch, 20 Hz-20 kHz)
Damping Factor	60 (1 kHz, 8 Ω)
Input Sensitivity and Impedance	175 mV/33 kΩ (Line) 4.8 mV/47 kΩ (Phono MM)
Rated RCA Output Level and Impedance	0.175 V/2.2 kΩ (Recommended)
Phono Overload	100 mV (MM, 1 kHz)
Frequency Response	10 Hz-100 kHz/+1 dB
Tone Control	+/-14 dB, 100 Hz (B) +/-14 dB, 10 kHz (T) +8 dB, 80 Hz (PM B)
Signal-to-Noise Ratio	105 dB (Line, IHF-A) 80 dB (Phono MM, IHF-A)
Speaker Impedance	4 Ohms - 16 Ohms

General

Power Supply AC	220-230 V~, 50/60 Hz
Power Consumption	135 W
Standby Power Consumption	0.3 W
Dimensions (W x H x D)	435 x 139 x 330.3 mm
Weight	7.4 kg

CARTON

Dimensions (W x H x D)	572 x 264 x 419 mm
Weight	9.4 kg

Supplied Accessories

Instruction manual	Yes
AC power cord	Yes
Remote controller	Yes
AAA (R03) batteries	x 2
